# Why Knowledge Explorer?

Born out of partnership

Help me put all  
of my  
knowledge in  
one place

And make it  
easy for me to  
search it

So that I can  
find accurate  
answers  
quickly

# The Center of Everything

So that we can power anything

"Knowledge Assistant represents a major leap forward in our mission to transform financial services with AI. By providing instant access to accurate information, we **empower employees to excel in their roles and enhance the customer experience.**" - Matt McEachern, Chief Product Officer

# Knowledge Assistant: Q2 '24

Powered by Knowledge Explorer

**20,000**  
documents  
uploaded

**127,000**  
Searches

**96% Answers**  
Found

---

**"It shaves minutes off calls. The accuracy has been incredible too, and it aids in enhancing our members' trust...We are increasing the accuracy and efficiency of responses, leading to a higher first call resolution."**

- Steve Goodwine, HVCU VP,  
Director of Contact Center

# The Future of Knowledge Assistant

AI-powered KMS

Now

## Maintain

**More control and functionality for your knowledge base**

- Schedule and deprecate time-boxed comms and documents
- Gain visibility around aging and out-of-date documents
- Assign document owners and notify them when action needs to be taken

Next

## Audit

**Ensure that your knowledge base is complete**

- Automatically identify knowledge gaps
- Go deeper with feedback-driven scoring
- 24/7 monitoring of doc health and comprehensiveness

Then

## Create

**Create new knowledge directly within the Knowledge Explorer**

- Create new docs and update existing
- Posh-approved templates
- Bulk update the contents of docs

# KMS: Maintain

Schedule promotions,  
assign and notify owners,  
gain visibility around the  
health of your knowledge  
base

At Posh, Knowledge is the center of everything

So that we can power anything

# The Overlooked *Power* of the Search Bar

**40% of visitors** head directly to the search bar

Searchers are **2x more likely to take desirable actions**

+80% of FIs **don't optimize their on-site search**

# Answers

*Your Customers have Questions, We Have Answers*

## **Instant, personalized answers**

Immediately answer member/customer questions, giving them the help they need in less clicks

## **Get members to take action**

Each answer contains prompts and links to take the next step

## **+50 languages, ¡Hola! 你好! Hej!**

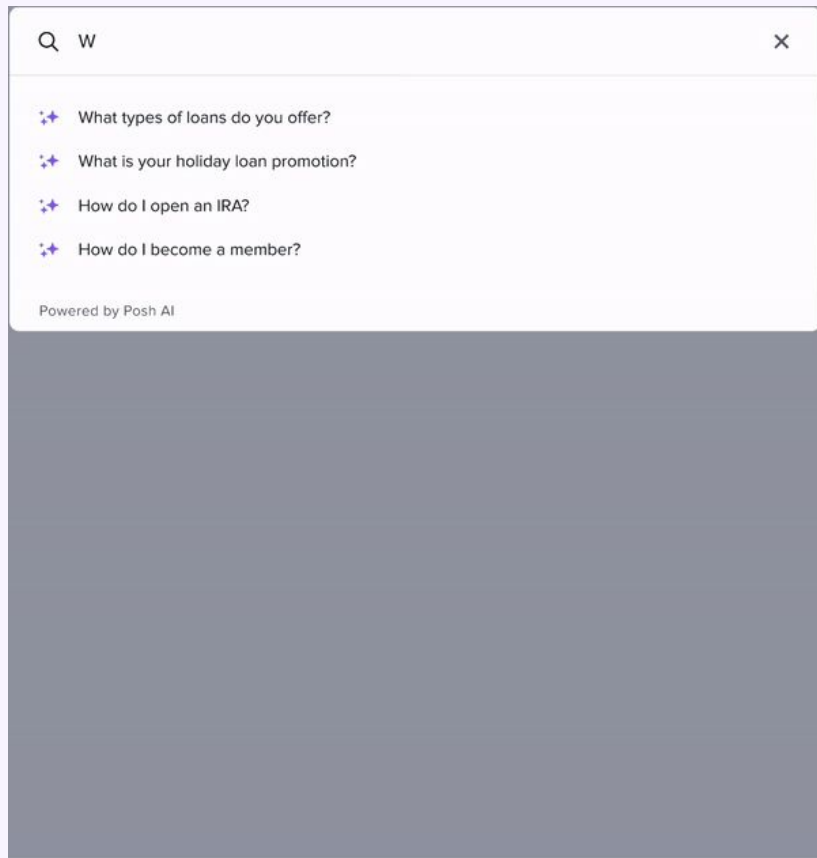

Serve your members in their native language, regardless of the language of your web content

## **Easy to install, easy to maintain**

Answers learns from your website in minutes and installation is as easy as copy-paste.

## **Powered by Knowledge Explorer**

Answers is powered by our Knowledge Explorer, ensuring your agents and users access the same relevant information.

# Posh's AI platform is purpose-built for banking

## Full coverage across the support landscape

*Enhanced customer satisfaction*

*Improved employee confidence*

*Increased revenue*

# What's Changing?

An overview of improvements as part of this Platform upgrade

## Earcons

A subtle chime that plays after each participant finishes speaking - a way to gently acknowledge that improves conversation flow.

## Improved Speech Recognition

Improved speech transcription and understanding performance, including in the presence of background noise

## Improved Latency

Reduced wait time between the user finishing their question or statement, and the assistant responding.

## New Voices

We have a brand new suite of voices. We're pushing the bleeding edge of speech synthesis with hyper-realistic voices.

# Earcons

*Earcons are a subtle acknowledgement that either party is done speaking, and the other may respond. For conversational applications, these subtle sounds greatly improve the flow of conversation between caller and virtual assistant.*

How can I help you today?

Earcon chime

What's my balance?

Earcon chime

To use phone banking, we will need you to login.

What's your member number? Please use the touchpad, followed by the pound key.

Earcon chime

5-3-4-2-6-6

Earcon chime

# Improved Latency

By moving phone call audio handling in house, we are able to better control latency and improve how quickly we are able to understand and respond to the member. Expect to see **several hundred milliseconds improvement**. Every millisecond counts!

*What's my balance?*

◆◆ *Earcon chime* ◆◆

*To use phone banking, we will need you to login.*

# New Voices

More natural sounding voices. That's all there is to it!

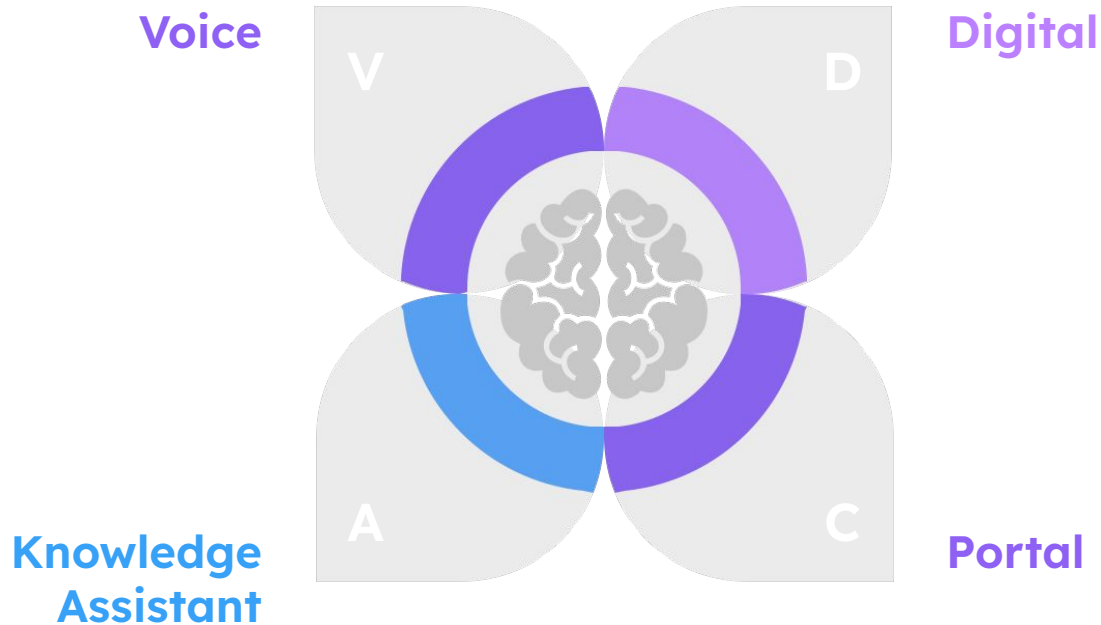

If you're interested in these, please reach out! These voices can be used at anytime once you're migrated.

**Optional** - you're welcome to continue with your current voice

Elon Musk  

@elonmusk

This weekend, the [@xAI](#) team brought our Colossus 100k H100 training cluster online. From start to finish, it was done in 122 days.

Colossus is the most powerful AI training system in the world. Moreover, it will double in size to 200k (50k H200s) in a few months.

Excellent work by the team, Nvidia and our many partners/suppliers.

# Apple Intelligence

## The Big Winner...

# Takeaways

CC Software Co's are suffering due to competition and AI fears

Massive AI investment by Big Tech + xAI, especially into GPUs

Extreme AI FOMO - many investments being made as a defense, not offense

Haphazard appeasement - "Wait, we do AI, too - see!" - rushed solutions

Changing pricing models, longer contract terms, consolidation & bundling w/ AI

Nvidia is the "big winner" - the party goes on, but cracks are starting to show

**But now let's  
talk about  
banking...**

MARKET STUDY

# The Application and Consumer Perception of **Artificial Intelligence** in Banking

**“75% of regional and community financial institutions [RCFI’s] are at least experimenting with AI in various operational areas”**

**“88% of RCFIs [are] saying their AI initiatives have been mostly or very successful. “**

Top Strategic Priority in AI Adoption	Total	Banks	Credit Unions
Protecting the institution from fraud or threats	44%	46%	43%
Improving customer/member experience (e.g., digital assistants)	41%	42%	41%
Protecting customers/members from fraud or threats	40%	43%	38%
Automating manual processes for customers/members	38%	34%	43%
Automating manual processes for employees	57%	49%	66%
Improving operational efficiency	38%	45%	30%

“the top reservation, by a significant margin, is making sensitive data available to the wrong people (cited by 44% of decision makers as their biggest concern).”

“A substantial 76% of community banks and credit unions are trusting advice from third-party technology providers [external experts] for guidance on leveraging AI utilization in their organization”

“The emphasis on external parties for advice may be due to the fact that 37% of institutions say they do not have the knowledge and skills to develop AI solutions”

“Without this knowledge, these institutions risk being overly influenced by third parties in a field often surrounded by media and industry hype.”

**So how should  
FI's react?**

# The Pillars of a Good AI Strategy

How to set up your FI for AI success

## Seek real value

First principles - which use cases are slated to add the most value? Which are vaporware? Have success criteria - measure and validate.

## Don't skimp

AI is increasingly taking a more dominant slice of the customer interaction pie. Let it be a differentiator by having nice things.

## Understand AI

Do not succumb to the unknown.. Know how AI works, know the risks - ethical, privacy, & security. Work with AI experts - insist that vendors educate you.

## Start fast, but start small

Risk management, not risk avoidance. Get your feet wet, learn, then iterate and scale.

## Evangelize & advocate

Celebrate the potential, be honest about the risks. Assuage fears, parse through the noise.

**Beware of  
rocket cars**

**Don't Skimp  
[on the things that matter]**

**Get your feet wet  
[if you haven't yet]**

# Understand AI [or partner with vendors that do]
